RAILWAY RESERVATION SYSTEM

The purpose of this source is to describe the railway reservation which provides the train timing details reservation, billing and cancellation on various types of reservation.

The system will be used by 2 types of users, admin and customers.

* Admin: These are the people who add, updates, delete train database records. They even can modify the available data and make it available to users in reasonable time. Any delays in the trains are being updated with admin account. They play most important for any update in data.

* Customer: These are the people who check for availability of seats in train, search train from number of train name, check status of reservation i.e. CNF, KM. They can book tickets with different modes of payment i.e. cash, cards. No. can even get refund after cancellation with suitable cancellation time.
