Student Information System

ERP system for colleges to manage their daily activities which includes the management of Employees, Students, Books and Library records, parent details, Assignments, Admin, exam results and reports.

* The system will be used by 4 people:

Admin, Teacher, Librarian, Student

* Admin can login using valid credentials and perform various tasks such as adding a teacher, student etc.

* Admin can also add timetable and event details. System allows admin view book request record from librarian.

* Teacher can login and perform various tasks such as adding assignment, marking attendance, uploading result and viewing event.

* Librarian can login and perform tasks such as adding single or multiple books, reviewing adding books, requesting a book, returning issued book to students and viewing events.

- * Students can access the system by providing valid credentials and access modules such as viewing their own profile, viewing books time table etc.
- * Super admin is the root user who adds the colleges into the system with valid details. They can view / delete a college from the system.
