Graphics Editor:

The graphics editor software is an interactive application that allows the user to create, edit, layout, save and print arbitrary graphs. These software are usually managed and used by consumer, administrator and developer from

* Consumer

These are typically the users who usually use software for personal edits and frames and can be continued to use for professional purposes with valid copyrights. They ~~are~~ don't have access to overhaul features but can only change feature values and other.

* Administrator

These people are usually helped for managing the user accounts and their status of usage and payment receipts (of premium used). They have access to modify user data with certain authorized

* Developer team:

These people are responsible for maintaining and regular updates of software for enhanced user experience and carry most of the process. They are in group and have access to every bit of code and can use for feedback in format to get more insights about the features to be improved and modified.
